ABOUT ME

I'm a student at REC Rewa engineering college.

Currently, I am finishing my final year of studies and am open to work related to web-development.

I am learning web-programming languages such as HTML and CSS. In the future I hope to master these programming languages.

SKILLS

EDUCATION

Bachelor Of Technology
Govt. Rewa Engineering College
In progress

Primary And High School
Saraswati Shishu Mandir Rewa
Finished

Web Development Course
Edunet foundation
In progress

PROJECTS

Web HTML info Website

This is my latest and most advanced project. It is a website about HTML and CSS. First, it tells you to sign up to access the website. When you are finished it takes you to the main website about HTML and CSS. The website is hosted by W3Spaces and is written in HTML, CSS and JS.

- HTML, CSS
- JavaScript

Web HTML registration form

This is my second project on HTML. In this project it says for you to register and below it lists some questions for you to answer. It is made with the HTML function form which is used to create sign up or login forms. In the future I wish to develop this form further by integrating CSS fonts.

- HTML, CSS
- JavaScript

Web Page About Madhya Pradesh

This is my first and one of my best projects on HTML. This is a web page about Madhya Pradesh. It includes information about Madhya Pradesh and a video about Madhya Pradesh by Incredible India. In the future I would like to fix all the spelling mistakes and make it better in style terms.

- HTML, CSS
